Langkah-langkah untuk menginstal wordpress adalah:

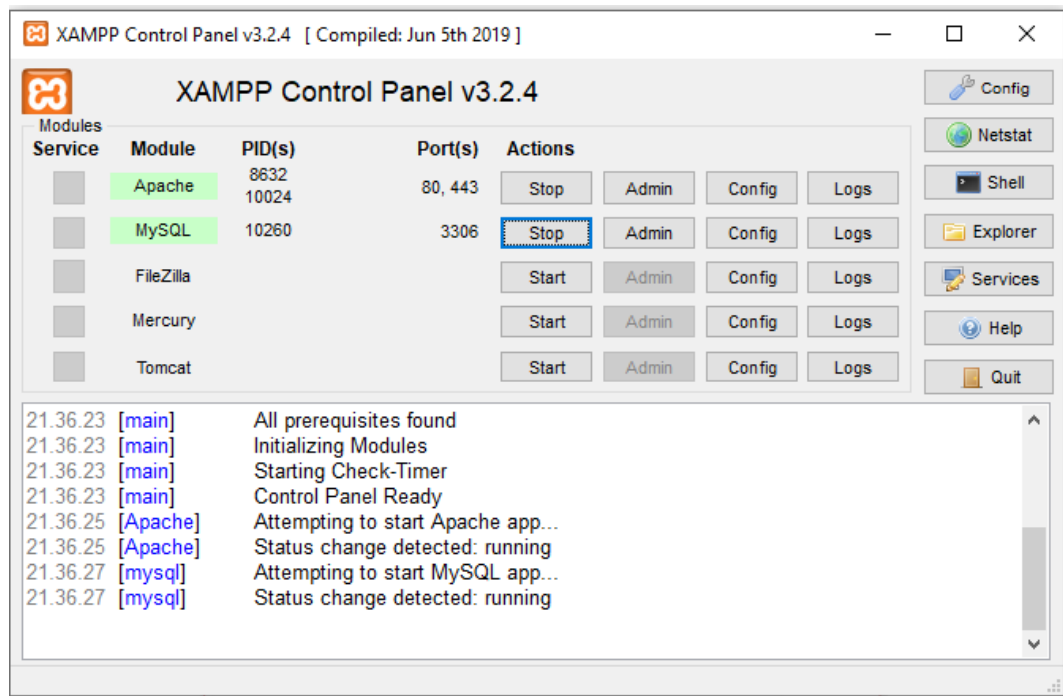

1. Mengunduh file pada laman web wordpress, yaitu <https://wordpress.org/download/>

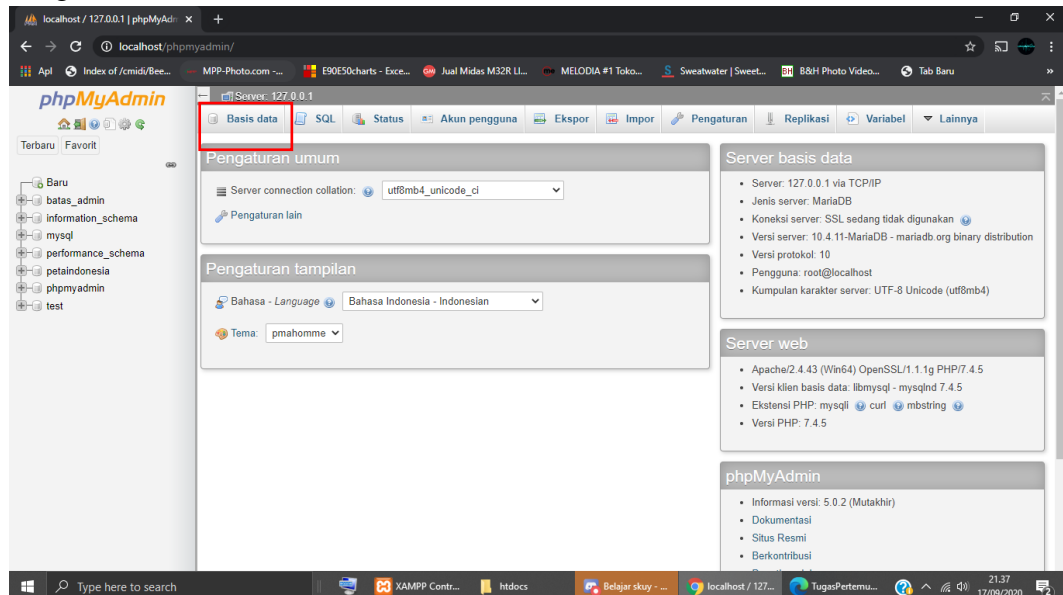

2. Memindahkan file yang telah diunduh ke htdocs dari XAMPP (D:\XAMPP\htdocs), di sini saya tidak menggunakan bitnami. File yang dipindahkan hanya wordpress saja bukan wordpress-5.5.1

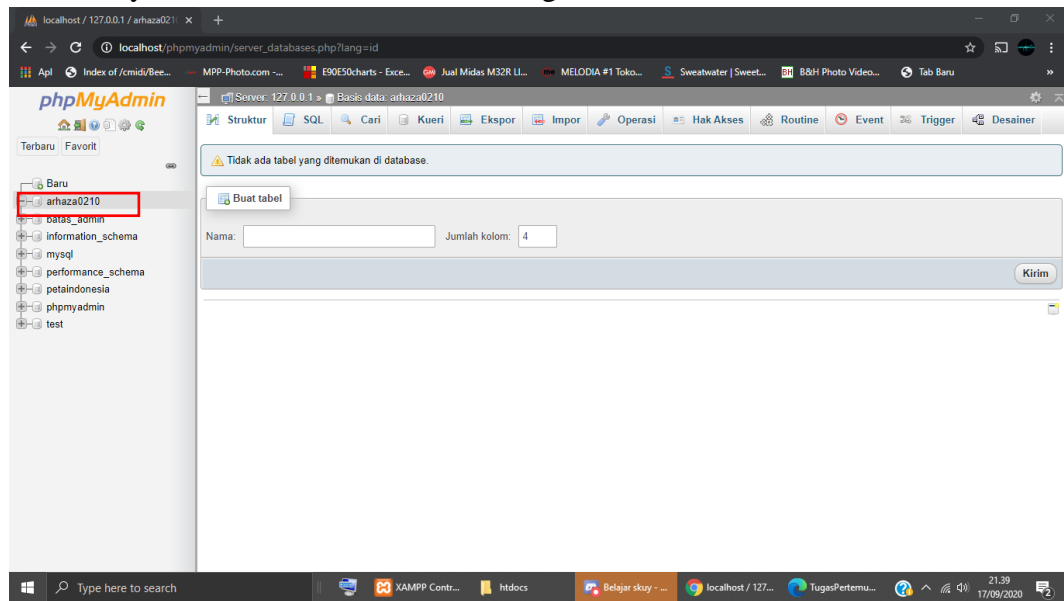

3. Mengaktifkan module Apache dan MySQL pada Control Panel XAMPP

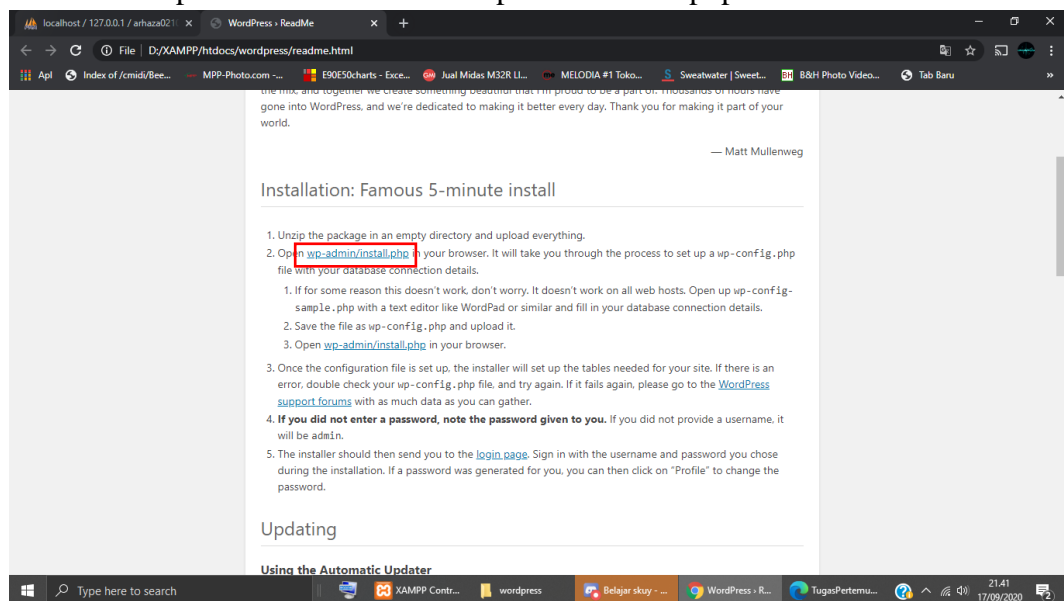

4. Mengakses localhost pada web dengan cara mengetikkan <http://localhost/phpmyadmin> kemudian Klik basis data dan buat database baru dengan cara memberi nama database lalu klik buat.

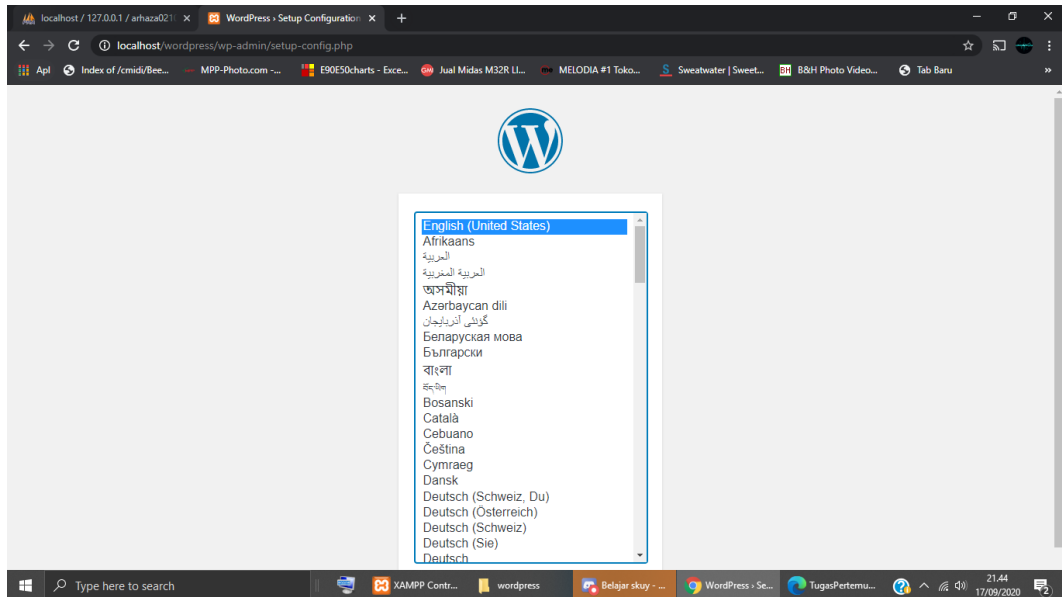

5. Di sini saya sudah membuat database dengan nama “Arhaza0210”

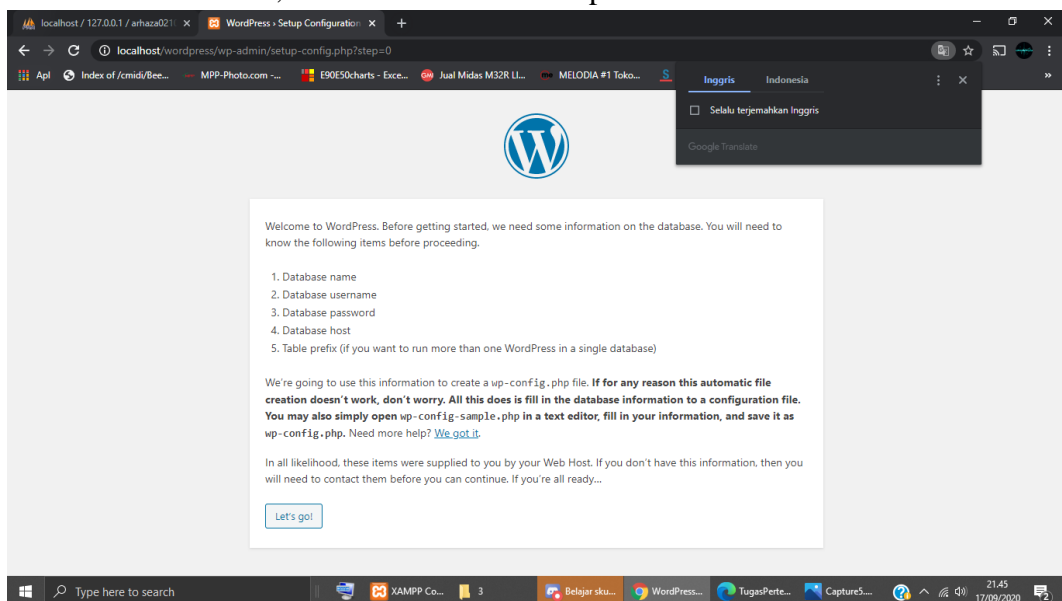

6. Setelah membuat database, kita buka folder wordpress yang telah kita download dan membaca readme.html atau kita bisa juga langsung membuka dengan mengetik <https://localhost/wordpress/wp-admin/setup-config.php> maka akan tertera file seperti ini. Lalu kita klik wp-admin/install.php

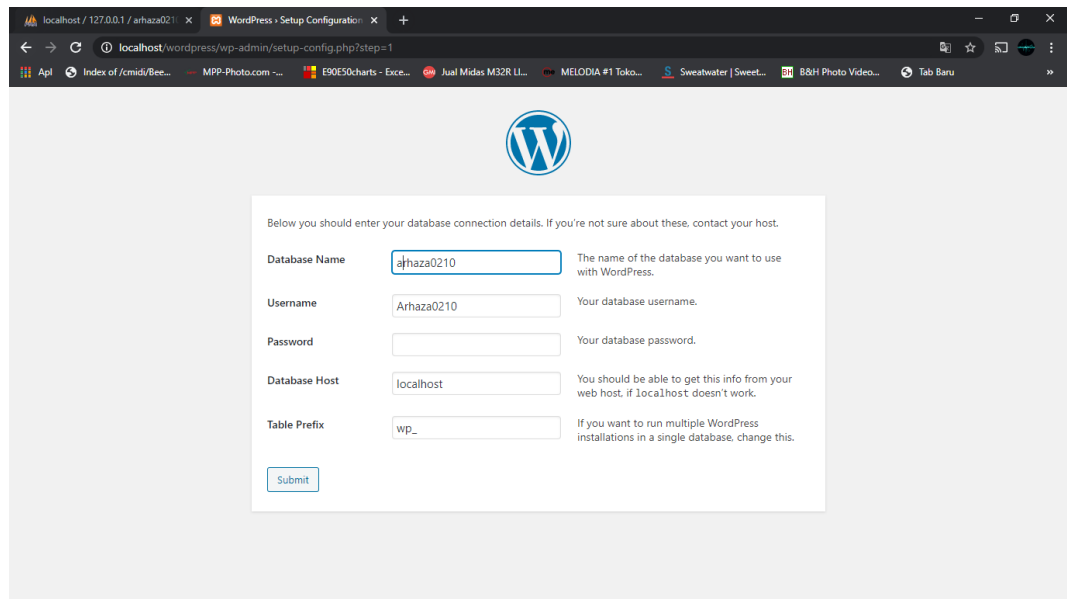

7. Setelah itu akan muncul web ini, kita mendapat pilihan untuk memilih bahasa yang diinginkan setelah itu klik “Continue”

8. Setelah kita continue, maka akan muncul tampilan ini dan kita klik “Let’s Go!”

9. Akan muncul isi database yang harus kita isi. Pada kasus ini, saya hanya bisa menggunakan username root dan tidak bisa mengisi password.

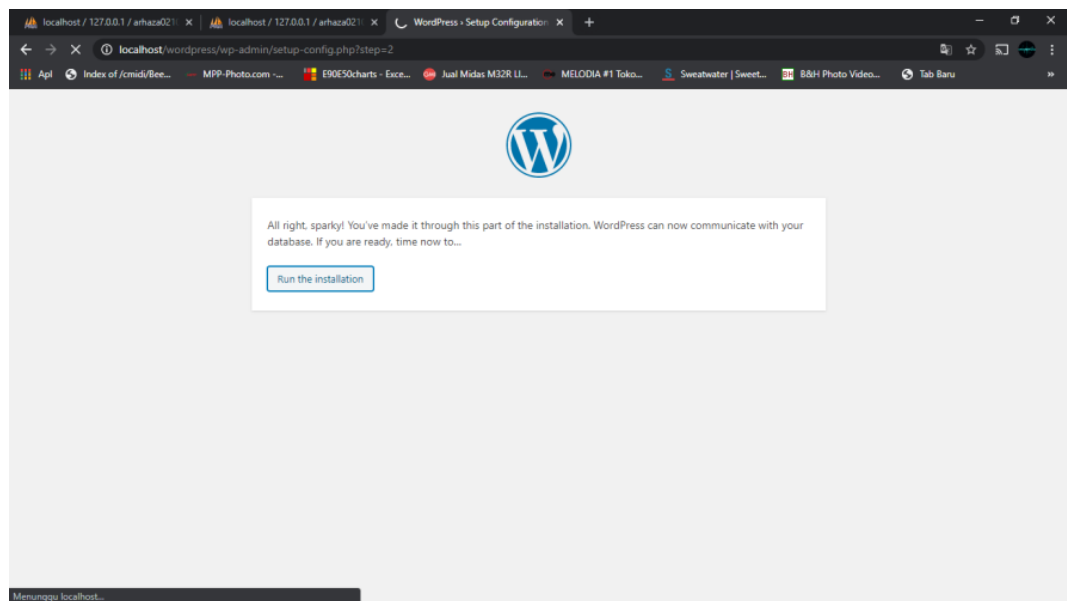

The screenshot shows the WordPress Setup Configuration screen (Step 1) in a web browser. The URL is localhost/wordpress/wp-admin/setup-config.php?step=1. The page features the WordPress logo at the top. Below it, a message states: "Below you should enter your database connection details. If you're not sure about these, contact your host." The form contains the following fields and labels:

- Database Name:** Input field with "arhaza0210". To the right: "The name of the database you want to use with WordPress."
- Username:** Input field with "Arhaza0210". To the right: "Your database username."
- Password:** Empty input field. To the right: "Your database password."
- Database Host:** Input field with "localhost". To the right: "You should be able to get this info from your web host, if localhost doesn't work."
- Table Prefix:** Input field with "wp_". To the right: "If you want to run multiple WordPress installations in a single database, change this."

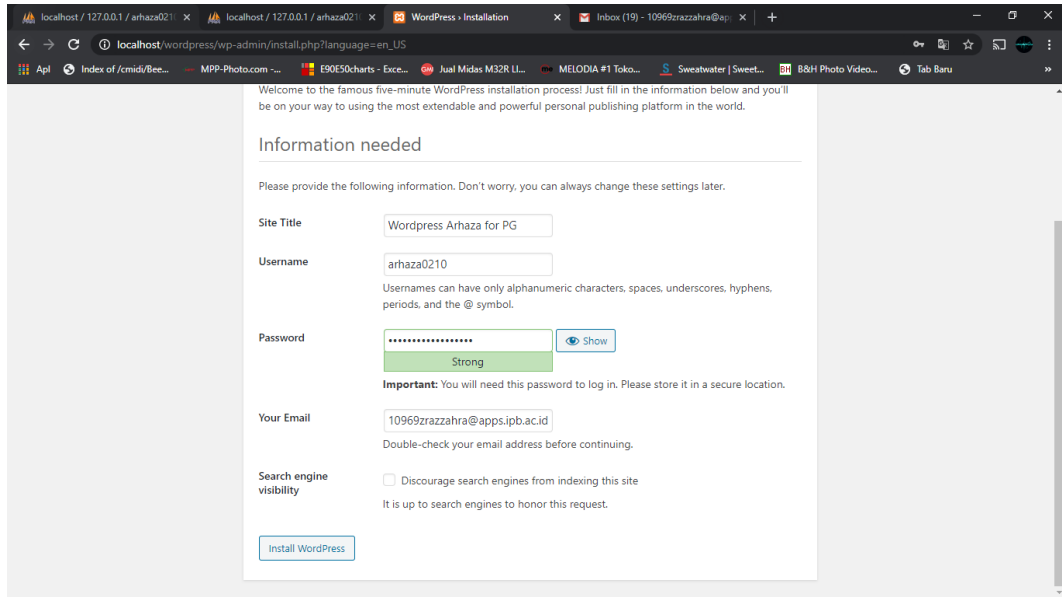

A "Submit" button is located at the bottom left of the form.

10. Lalu klik submit. Setelah submit akan muncul "Run the installation" dan kita klik button itu

The screenshot shows the WordPress Setup Configuration screen (Step 2) in a web browser. The URL is localhost/wordpress/wp-admin/setup-config.php?step=2. The page features the WordPress logo at the top. Below it, a message states: "All right, sparkly! You've made it through this part of the installation. WordPress can now communicate with your database. If you are ready, time now to..." A "Run the installation" button is located at the bottom left of the message box.

11. Setelah mengklik “Run the installation”, kita mengisi informasi yang dibutuhkan. Lalu klik “Install Wordpress”

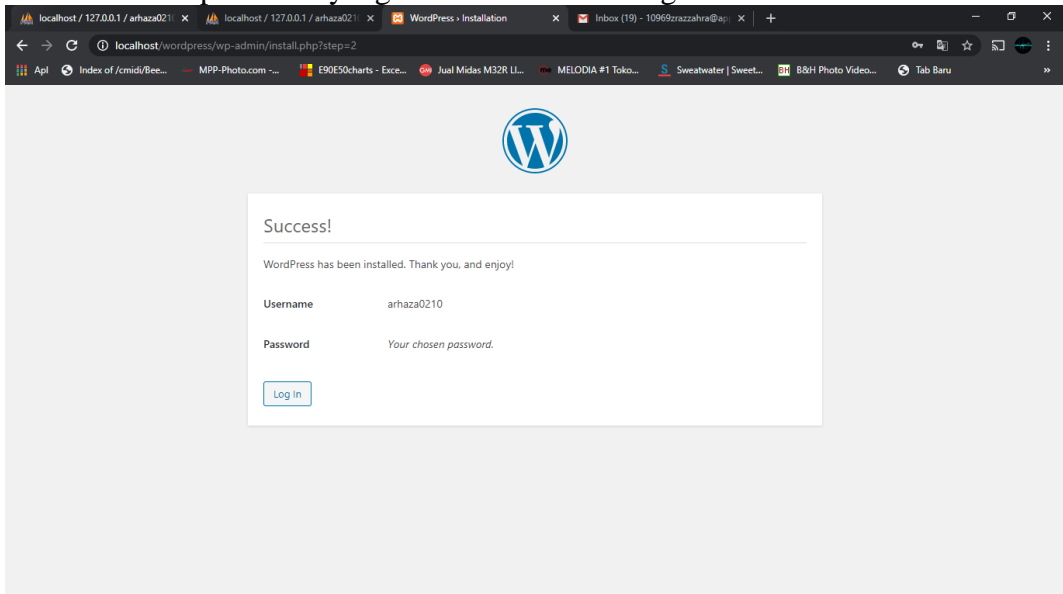

The screenshot shows the WordPress installation wizard at the 'Information needed' step. The browser address bar indicates the URL is `localhost/wordpress/wp-admin/install.php?language=en_US`. The page content includes a welcome message and a form with the following fields and options:

- Site Title:** `Wordpress Arhaza for PG`
- Username:** `arhaza0210`. A note states: 'Usernames can have only alphanumeric characters, spaces, underscores, hyphens, periods, and the @ symbol.'
- Password:** A masked password field with a 'Show' button. A strength indicator shows 'Strong'.
- Your Email:** `10969zrazzahra@apps.ipb.ac.id`. A note says: 'Double-check your email address before continuing.'
- Search engine visibility:** An unchecked checkbox labeled 'Discourage search engines from indexing this site'. A note below says: 'It is up to search engines to honor this request.'

An 'Install WordPress' button is located at the bottom left of the form area.

12. Setelah sudah akan muncul tampilan seperti ini dan kita melakukan log in untuk melanjutkan. Nanti, akan masuk ke tampilan baru lagi untuk memasukan username dan password yang telah kita buat di langkah 10

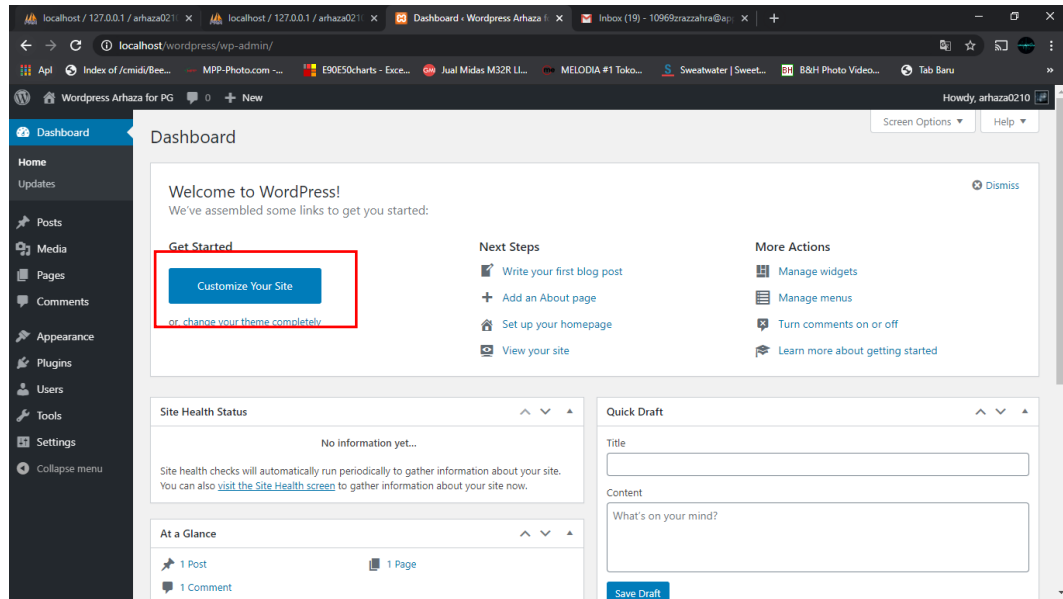

The screenshot shows the 'Success!' screen of the WordPress installation. The browser address bar indicates the URL is `localhost/wordpress/wp-admin/install.php?step=2`. The page features the WordPress logo at the top and a confirmation message: 'WordPress has been installed. Thank you, and enjoy!'. Below this, the following information is displayed:

- Username:** `arhaza0210`
- Password:** `Your chosen password.`

A 'Log in' button is located at the bottom of the information box.

13. Setelah kita melakukan log in, maka akan muncul website wordpress dan kita bisa langsung meng-klik “Customize your site”

14. Akan muncul tampilan wordpress dan kita bisa meng-costumize tampilan website kita sesuai kemauan kita. Selesai.
